Re: RFG fuel in Las Vegas

Dear Mr. Munzing,

The availability of Reformulated Gasoline (RFG) in the Las Vegas market is limited by several factors.

1. It can only be supplied from terminals located in Arizona or California. Supply at those terminals may also be limited to certain customers and not available to all suppliers in the Las Vegas market.
2. There are no storage facilities in the Las Vegas area for RFG and the demand for RFG is limited to entities.
3. Deliveries need to be scheduled approximately three days in advance in order to ensure that product arrives when needed.
4. Cost increases dramatically when going out of state. California has many new regulations and taxes that are having a direct effect on the cost of fuel.

Outside of these factors, it may be time to research the actual RFG requirements in the NAC486A. The Unleaded fuel in Las Vegas has changed and may meet or exceed the requirements of that regulation. The cost and other environmental impacts incurred when delivering fuel from out-of-state needs to be considered in any evaluation of the benefits of using RFG in Las Vegas.

If you need any other information, please contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Gregg Benson", written over a horizontal line.

Gregg Benson, Fuel operations controller
