

**Notice and Agenda for Workshops to Solicit Comments on Proposed Regulation
Amendments**

NAC 278.290, 278.330, 278.340, 278.390 and 278.490

Subdivision of Land

The Nevada Division of Environmental Protection (NDEP) Bureau of Safe Drinking Water (BSDW) is proposing to adopt regulations amending the Nevada Administrative Code (NAC) 278 for Subdivisions. The following workshops have been scheduled to solicit comments from persons interested in the regulatory amendments (petitions) generally described below.

The NDEP considered this amendment at the request of the Builder’s Association of Northern Nevada and the Washoe County Health District. The existing regulation prohibits *any* construction from occurring at a proposed Subdivision until a Final Map is approved. An alternative was requested to consider allowing mass grading of a proposed Subdivision earlier in the review and approval process. To ensure the protection of public health, the NDEP and Washoe County wanted to maintain a mechanism to ensure that land grading will not negatively impact the engineering design of water and wastewater infrastructure. The proposed amendments will permit land development to begin with clearing, grubbing, and grading upon Agency review and approval of utility “improvement plans” prior to Final Map approval. One additional minor amendment identifies the current Agency charged with laboratory certification.
