Re: Regulation P2010-08: Water Quality Standards for Class D Waters &
Removal of Nevada Administrative Code References to Tribal Waters on the
Fort McDermitt Indian Reservation

Dear Ms. Corp:

Tony Lesperance
Director, Department of
Agriculture

Enclosed for "drafting" by the LCB Legal Division is a proposed permanent regulation that would amend NAC 445A. This regulation proposes changes to Water Quality Standards for Class D waters and removal of Nevada Administrative Code references to Tribal waters on the Fort McDermitt Indian Reservation. When the Nevada Division of Environmental Protection (NDEP) updated the Class Waters to the E. Coli bacteria standard in 2008, EPA required Nevada to perform an assessment of the Class D waters, which do not have contact recreation as a beneficial use, to determine if the waters would now meet the fishable/swimmable goal of the Clean Water Act. NDEP is proposing to add contact recreation and the associated bacterial water quality standard to four segments of the Class D waters. In an unrelated matter, the State of Nevada water quality regulations are not applicable to waterbodies on tribal lands. Accordingly, changes are proposed to the NAC to remove the segments of these reaches that are on tribal lands.
