**R115-10: Financial Assistance for Construction of Wastewater Treatment & Pollution Control Projects:** This regulation amends NAC 445A. Revisions to the regulation govern financial assistance for construction of wastewater treatment & pollution control projects. Revisions to the regulation make the Clean Water and Drinking Water State Revolving Fund more consistent with program elements such as the Division of Environmental Protection's Priority List and the Intended Use Plan.

The revisions also remove the requirement that project design be completed prior to project funding. The removal of this requirement will allow communities, which cannot afford up front engineering cost, to utilize state revolving funds for such activities. The regulation also removes confusing language for calculating fixed amounts for planning and design costs.
