Notice of Public Workshops

August 4, 2008

The Bureau of Water Quality Planning of the Nevada Division of Environmental Protection is proposing to revise the aquatic life water quality standard for molybdenum contained in NAC 445A.144, "Standards for toxic materials applicable to designated waters". The revised molybdenum aquatic life criteria were developed following USEPA protocols for deriving protective aquatic life criteria and are based on available and relevant toxicological data and supporting information. The draft rationale document summarizing the proposed change to the molybdenum aquatic life standard and the supporting technical report describing the derivation of the molybdenum aquatic life criteria values are available on request and also online at

Workshops will be held at the following locations at the dates and times indicated. The workshops will consist of a brief presentation of the proposal by the Division followed by a question and answer period. The purpose of the workshops is to solicit public comments on the proposed revisions to the Nevada water quality regulations. No items will be voted on and no actions will be taken. Written comments on the proposed revision may be submitted to NDEP until September 12, 2008.
