Proposed Regulation

Nevada Department of Motor Vehicles:

6) R052-12: DMV Smog Check Program: (For Possible Action)

The Nevada Department of Motor Vehicles (DMV) is proposing to amend certain portions of state regulations in NAC 445B that cover the motor vehicle emissions inspection and maintenance program, also referred to as the smog check program. Assembly Bill 414 was passed by the 2009 Nevada Legislature and resulted in (NRS) 445B.767, which established the authority of the State Environmental Commission (SEC) to adopt regulations to create a voluntary program of electronic monitoring of motor vehicle emissions information. The program applies to motor vehicles subject to the motor vehicle emissions inspection and maintenance program in counties whose population is 100,000 or more. In accordance with NRS 445B.767, the proposed regulations have been developed by the DMV in cooperation with the air quality agencies in both Clark and Washoe County.

The DMV is proposing to create a new, voluntary program which will allow fleets to comply with motor vehicle emissions testing requirements by means of engaging the services of an authorized vendor of an electronic data management and monitoring system. Under this program, vendors will attach electronic devices to fleet vehicles that will monitor the vehicles' emission control systems and transmit emissions compliance data directly to the DMV in an electronic format. This electronic means of demonstrating compliance eliminates the need for the fleet owner to take the vehicle to an emissions testing facility for the annual emissions test. By statute, the fleet

owner is still responsible for paying the \$6.00 emissions certificate fee that would normally be charged at an emissions testing facility. The proposed regulations establish the requirements and procedures that fleet operators and authorized vendors must follow to participate in the program.

This regulation will not have an immediate or long-term adverse economic impact on the public or the business community. As noted above, businesses that qualify as a fleet and sign an agreement with the DMV will still be subject to paying the annual \$6.00 emissions certificate fee for each vehicle in the program, but will not have to pay the inspection service fee normally charged by an emissions testing station. Fleets will also have to pay the electronic data management service fee to the authorized vendor. There will be no additional costs to the State for enforcement of the proposed regulation and the regulation does not overlap, duplicate or conflict with any regulations of other government agencies. The regulation does not address fees.
