NAC 445B.001-.3497
AIR CONTROLS: AIR POLLUTION**

The Nevada Division of Environmental Protection (NDEP) is proposing to amend regulations pertaining to Chapter 445B of the Nevada Administrative Code (NAC). The amendments affect Nevada's operating permits program, specifically (1) sources that are subject to the federal New Source Review (NSR) and Prevention of Significant Deterioration (PSD) rule and (2) stationary sources that are making a major modification in or locating a major stationary source in an area designated as nonattainment for the 8-hour ozone standard.

The following workshop has been scheduled to solicit comments from interested persons:

Conference Room A
Nevada Department of Wildlife
1100 Valley Road
Reno
9:00 AM to 11:00 AM**

On December 31, 2002, the U.S. Environmental Protection Agency adopted revisions to the federal NSR and PSD rule, effective March 3, 2003. The amendments proposed here to NAC 445B.001-.3497 integrate the federal rule changes into the existing State regulations. This is necessary to maintain program delegation for NSR and PSD, thereby allowing NDEP to implement the new federal provisions. The ozone nonattainment amendments are necessary as a result of new 8-hour National Ambient Air Quality Standards (NAAQS) for ozone.

A copy of materials relating to the proposal may be obtained at the workshops or online at <http://ndep.nv.gov/baqp/index.htm>, under "Navigation" select "NAC Amendments" then see P2004-22. Materials are also available from Adele Malone at NDEP, 333 West Nye Lane, Carson City, NV 89706; telephone, (775) 687-9356 or e-mail, amalone@ndep.nv.gov. Members of the public who are disabled and require special accommodations or assistance at the meeting are requested to notify Adele Malone no later than July 21, 2004.
