ENVIRONMENTAL PROTECTION

Dear Executive Secretary Fontaine,

I do not have access to print
Form # 3.

As a 78 year old breast cancer
thriver I am extremely concerned about
the issuance of a permit for MediWaste
Disposal LLC in my home town of
Pahrump.

Living in a beautiful desert
gives residents lots of "poof"
dust from any disturbance of soil.
Many of us suffer from allergies,
lung issues from this dust.

Permitting a facility to transport
and allow pyrolysis of medical waste
seems dangerous to residents and
workers.

Our Pahrump fire fighters are
not trained nor equipped to
handle toxic fires.

I urge the Nevada Division of Environmental Protection - Bureau of Sustainable Materials Management to protect Pahrump's fragile desert environment. Please do not allow medical waste to be allowed to cause potential harm.

Thank you for reading my letter.

Carol L. Jones
