Regulatory Petitions

4) Permanent Regulation R034-26P: Bureau of Sustainable Materials Management - Establishing a Single Regulatory Framework for Hazardous Waste and Hazardous Secondary Materials (For Possible Action)

R034-26 proposes to establish a single regulatory regime for facilities seeking to manage recyclable materials whether classified as hazardous waste or hazardous secondary materials. This amendment also proposes to establish an annual fee for the Division's oversight of these types of facilities and existing facilities operating under a written determination authorization from the Division and updates some portions of federal requirements adopted by reference.

The proposed changes are expected to have minimal economic impact on the public, the regulated community, and the Division.

5) Permanent Regulation R123-24P: Bureau of Administrative Services - Office of Financial Assistance - Clean Water State Revolving Fund Regulations (For Possible Action)

This regulatory petition was adopted by the SEC in January 2026, and proposed the following amendments to the Clean Water State Revolving Fund regulations in NAC 445A:

1. Align with the adoption of Assembly Bill (AB) 20 (83rd Session)
2. Define the term "affordability criteria,"
3. Amend the environmental review process,
4. Amend the administrative fee for loans,
5. Align state regulations with federal regulations, and

6. Clean up outdated language and processes.

This petition was deferred by the Legislative Commission in February 2026 for some additional clarification regarding the prevailing wage requirement.

Neither the original or additional proposed changes are expected to have a significant economic impact on the public, the regulated community, or the Division.

6) Permanent R145-24: Bureau of Mining Regulation and Reclamation - Interim Fluid Management (For Possible Action)

R145-24 proposes updates to the payment schedule to be deposited in the Trust Fund for Short-Term Fluid Management pursuant to NAC 519A.392. The updates will ensure that the balance of the Fund is sufficient to serve its purpose.

Language is also proposed to clarify the permissible uses of the Fund (including investment), that other forms of revenue may be received by the Fund (as per NRS 519A.150(4)), and that the proposed payment schedule is suspended during any year during which the Fund balance reaches or exceeds the target of \$15,000,000.

The proposed changes are expected to have some economic impact on the regulated community, and no economic impact on the public or the Division.

R146-24 proposes several changes to NAC 445A to reflect current conditions of stream reaches, existing names of waters, and to assure the most current criteria documents are referenced with regard to water quality standards for salinity of the Colorado River System.

The proposed changes are expected to have minimal economic impact on the public, the regulated community, and the Division.
