A REGULATION relating to hazardous waste; revising the fees for certain activities relating to hazardous waste and regulated units related thereto; imposing certain duties on certain persons who recycle hazardous waste; revising provisions concerning exceptions to certain federal regulations relating to hazardous waste adopted by reference; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law requires the State Environmental Commission to adopt regulations to carry out provisions governing the management of hazardous waste to: (1) protect human health, public safety and the environment from the effects of improper, inadequate or unsound management of hazardous waste; (2) establish a program for the regulation of the management of hazardous waste; (3) ensure safe and adequate management of hazardous waste; and (4) conserve resources of material and energy through the recycling or recovery of hazardous waste. (NRS 459.400, as amended by section 36 of Assembly Bill No. 40, chapter 220, Statutes of Nevada 2025, at page 1336, 459.485, as amended by section 43 of Assembly Bill No. 40, chapter 220, Statutes of Nevada 2025, at page 1338)

Existing law requires the Commission to adopt those regulations based on studies, guidelines and regulations of the Federal Government. (NRS 459.490, as amended by section 44 of Assembly Bill No. 40, chapter 220, Statutes of Nevada 2025, at page 1338) Existing regulations: (1) adopt by reference certain federal regulations with which a person who generates, transports, treats, stores, disposes or otherwise manages hazardous waste or used oil must comply; and (2) set forth certain specific parts and sections of federal regulations that are not adopted by reference or are adopted by reference but with certain revisions. (NAC 444.8632, 444.86325) **Section 3** of this regulation revises specific parts and sections of federal regulations that are not adopted by reference or that are adopted by reference with certain revisions.

Existing regulations require, with certain exceptions, a person who proposes to construct or operate a facility or mobile unit for the recycling of hazardous waste to obtain a written determination from the Administrator of the Division of Environmental Protection of the State Department of Conservation and Natural Resources that the facility will operate as a facility or mobile unit, as applicable, for such recycling before commencing the construction or operation of the facility or mobile unit. (NAC 444.8455) **Section 2** of this regulation requires a person who recycles hazardous waste to comply with: (1) certain federal requirements, as adopted by the regulations of the Commission; (2) local zoning requirements, in certain circumstances; (3) certain reporting and notification requirements; and (4) certain other regulations of the Commission. **Section 2** also exempts from these requirements owners and operators of certain facilities that recycle certain hazardous materials without storing those materials before they are recycled.

Existing law authorizes the regulations of the Commission to include provisions for fees to pay the cost of inspection, certification and other regulation. (NRS 459.500) Existing regulations establish a schedule of annual permit fees which the owner or operator of a facility for the management of hazardous waste is required to pay to the Division for certain activities and regulated units to offset partially the cost of inspection and other regulation of the facility. (NAC 444.845) **Section 1** of this regulation clarifies that the annual fees are imposed to offset the cost of inspection and other regulation of a facility and are not limited to fees for permits. **Section 1** also establishes a \$5,000 annual fee for: (1) a written determination, issued by the Administrator of the Division, that a proposed facility or mobile unit will operate as a facility or mobile unit, as applicable, for the recycling of hazardous waste; and (2) owners and operators of certain facilities that recycle certain hazardous materials without storing those materials before they are recycled.

Section 1. NAC 444.845 is hereby amended to read as follows:

444.845 1. The owner or operator of a facility for the management of hazardous waste shall, on or before March 1 of each year, pay the following annual ~~permit~~ fee to the Division to offset partially the cost of inspection and other regulation of the facility:
