R052-15: The amendment revises NAC 519A to include a new section defining “mine impacted waters.” NAC 519A.270 and NAC 519A.345 are revised to require a reclamation plan to describe the measures that may be required to stabilize, manage, control, or treat mine impacted waters from waste and development rock piles, and open pit and underground mines. NAC 519A.360 is amended to require the costs for stabilization, management, control, and treatment of mine impacted waters to be included in the reclamation project bond, and to provide authority for the Division to bond for long-term fluid management costs such as perpetual treatment of mine impacted waters. Clarification is provided in NAC 519A.350 to include cash deposit as an acceptable reclamation surety.
