

To: Nevada State Environmental Commission

We are writing to respectfully request that the Commission vote to approve P2024-09, the proposed regulation to administer the Nevada Clean Trucks and Buses Incentive Program. Western Resource Advocates supported Assembly Bill 184, which passed with strong bipartisan support, and are enthusiastic to see the recent progress the Nevada Department of Environmental Protection (NDEP) has made on drafting regulations for the Nevada Clean Trucks and Buses Incentive Program. We appreciate the Nevada Department of Environmental Protection's work on synthesizing stakeholder feedback, which has resulted in the regulations before the Commission. The Nevada Clean Trucks and Buses Program will be crucial to helping Nevada's fleet transition to clean vehicles that save Nevadan businesses money and improve local air quality.

We respectfully request that the State Environmental Commission approve the regulations submitted by NDEP, as we are eager to be able to encourage eligible entities to apply for these incentives and deploy clean vehicles. We look forward to helping to implement this policy when it becomes available to Nevada businesses and entities.

Sincerely,

Jermareon Williams
Government Affairs Manager
